## **EFFORTS IN ENVIRONMENTAL EDUCATION**

We are striving to promote conservation of environment through rainwater harvesting, segregation of waste at source, recycling of organic waste, proper disposal of waste, use of energy saving equipment's, greening of campus, use of solar energy. We are also inculcating education and awareness among children, related to environment conservation and its protection. We also teach students (all classes) to plant a sapling wherever convenient, whether in school premises or at home or in the boundaries of the playgrounds or any other place which is approachable to them. Students present tree saplings to school on their Birthdays. We have good discussions in class about the variety/species of the tree/sapling

planted, its benefits, its occurrence, the kind of looking after it requires etc. This help the students relate to the activity better. Also many cultural programs were arranged related to environmental protection.

Dear Readers,

Vision determines direction of effort and prioritizing deployment of resources at our disposal, and our vision is to make our school one of the best schools of our country by providing 360 degree education to our students through best in class academic facilities.

We are drowning in information and severely starving for wisdom today. Fortunately, we are empowered with demographic dividend knocking on our door. We just need to break the cocoon and let in the beautiful colours of knowledge. I am sure in the coming years; we shall successfully channelize the halo of the young minds to explore best of their abilities. With this, let us foresee a world of universal singularity where our children are going to be the propellant of this change and the world shall be a beautiful place to live in..!
